OVERVIEW

Experienced IT Engineer with a diverse team of programmers, website developers, mobile application developers, and UI/UX designers. Proven track record of leading successful projects and delivering high-quality software solutions.

EXPERIENCE

Freelancer

Web Development

- Landing Pages and Multi-page Websites:
 - Utilized HTML, CSS, JavaScript, and React.js to create dynamic and responsive landing pages and multi-page websites.
- Blog API and Dashboard:
 - Developed an API and dashboard for a blog using Laravel, featuring posts, comments, tags, categories, and authentication logic.
- E-commerce Platforms:
 - Built comprehensive e-commerce websites for various markets, implementing features like product management, deals, and secure payment gateways.

Freelancer

Mobile App Development

- Wallpaper Notes App:
 - Developed an Android app for adding notes and images to wallpapers, achieving over 100k installs and a 4.44 rating on Google Play.
- Electronics Learning App:

- Created an educational Android app with interactive features and a neural network model for classifying electronic components.

Freelancer

Full Stack Development

- Book Website:
 - Developed a book website using Spring Boot and MySQL, incorporating MVC architecture and Thymeleaf for template rendering.
- Intermediary Platform for Buying and Selling Microservices:
 - Led the development of a platform using React and Django, integrating real-time chat and sentiment analysis.
- Social Book:
 - Designed and implemented a social platform with user authentication, data management, and responsive front-end interfaces.
